RE: RI Natural Heritage Report  
A.P. 40-1, Lot 4; Kingstown Road  
South Kingstown, Rhode Island

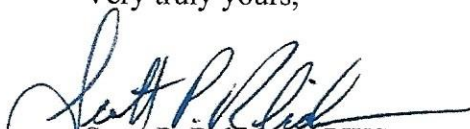

Dear Mr. Zarrella:

Pursuant to your request, my office reached out to the Department of Environmental Management, Division of Planning regarding the Natural Heritage overlay that encompasses the above referenced lot. I am enclosing a copy of the Natural Heritage Report generated by the DEM on July 16, 2024.

Two state threatened plant species have been observed within Asa Pond. This waterbody is located on the south side of Curtis Corner Road within approximately 800 feet of the subject lot. The plant species, Resupinate bladderwort and Swaying rush, both have the status of state concern. Each of these plants are found in open water along lakes, ponds and streams. There is no potential for either species to be present on the subject property.

Do not hesitate to contact me if you require any additional information.

Very truly yours,

  
Scott P. Rabideau, PWS  
Principal
