RE: Physical Alteration Permit Application No. 24-87
Proposed Peoples Credit Union
703 Kingstown Road
South Kingstown, RI

Dear Mr. Straley,

I am following up on recent conversations that the Rhode Island Department of Transportation (RIDOT) has had with your engineer. RIDOT is in receipt of your Physical Alteration Permit Application (PAPA) for the above-referenced project. The application is currently proceeding through our review process. The application has been through the Managing Engineer Initial Review and the Chief Civil Engineer Initial Review stages. Currently, it is at the Principal Engineer Review stage. This stage involves a technical review of the application that is performed by this office along with concurrent reviews from other applicable RIDOT Sections. In addition, and per the PAPA Regulations, the application is also being concurrently reviewed by the RI Historical Preservation & Heritage Commission (RIHPHC). To date there are no concerns with the proposed access that has been brought to my attention. Upon completion of the review by the necessary parties within the Department we will contact you with our comments, if any, or we will provide you with the permit approval letter.

The Department is doing its best to complete the review of this application but due to our current workload and available staff it has been a challenge. We appreciate your patience as we proceed through the review process.

Should you have any questions please contact Chris Walusiak, P.E. at 401-734-4829.

Sincerely,

Kyle P. Gagnon, P.E.
Managing Engineer
